I Love Science: A Journal For Self-Discovery And Big Ideas

Synopsis

A guided journal based on Rachel Ignotofsky's New York Times bestselling book *Women in Science: 50 Fearless Pioneers Who Changed the World*. Full of writing, drawing, and creativity prompts, *I Love Science* inspires kids (and adults) of all ages to fill the pages with ideas, self-exploration, and big dreams for the future. Opening with a short reference section that contains basic equations, the periodic table, basic HTML codes, and a measurement converter, the journal then invites the user to write and dream through writing prompts like, "What is a challenge you've overcome recently?" The journal also includes inspirational quotes from notable women who've achieved greatness in the science, technology, mathematics, and engineering (STEM) fields, such as famous primatologist Jane Goodall's, "Only when our clever brain and our human heart work together can we reach our full potential." With illustrations, quotes, and nifty science infographics, this journal will encourage you to ponder the world through tinkering, discovering, doodling, and more!

Book Information

Diary: 192 pages

Publisher: Ten Speed Press; Jou edition (March 7, 2017)

Customer Reviews

PRAISE FOR WOMEN IN SCIENCE: "Chances are you've heard of Jane Goodall and Marie Curie. But what about other female titans of the science world? . . . In this wittily illustrated, accessible volume, Rachel Ignotofsky highlights 50 women who changed the course of science." — *Wall Street Journal* "With short, inspiring stories and the accessibility of a graphic novel, *Women in Science: 50 Fearless Pioneers Who Changed The World* (Ten Speed Press) is the perfect book to share with the science- and tech-minded people (male and

female, young and old) in your life. . . .The must-read, girl-power STEM book." [InStyle.com](#) "This book of illustrated biographies of scientific pioneers is hands-down gorgeous. Rachel Ignotofsky's bright, bold drawings light up the short stories about the life and work of women ranging from Wang Zhenyi (a 16th century Chinese astronomy) to Mae Jemison (an American astronaut and educator). Kids will love paging through this, looking at all the detailed drawings, but they'll likely have to rip it out of the hands of the adults who are marveling at each new page of factoids." [Sarah Mirk, Bitch Media](#) "The book is a beautifully curated collection of personal narratives from female scientists from a wide variety of backgrounds and disciplines, with a dash of whimsy thrown in." [Upworthy](#) "I applaud Ignotofsky and her publisher for telling these important stories about women through such a rich, visual medium. The world needs more books like this." [ScientificAmerican.com's Symbiart](#) ". . .an illustrated homage to some of the most influential and inspiring women in STEM. . . .Ignotofsky captures the heartbreaking inequalities that only amplify the impressiveness of these women's feats." [Maria Popova, BrainPickings.org](#) ". . .a clever introduction to women scientists through history." [Science Friday](#) "True fact: This book is so cool that I had to go steal it back from my fifth grade daughter to review it. . . .this book perfectly balances well-researched facts with gorgeous, whimsical illustrations making it a favorite you just can't put down." [Cool Mom Picks](#)

RACHEL IGNOTOFSKY is an illustrator and designer. She graduated from Tyler School of Art's graphic design program and formerly worked as a senior designer and illustrator at Hallmark Greetings. Rachel and her work have been featured in many print and online media outlets such as Instagram, Babble, The Huffington Post, the Scientific American's blog, and BuzzFeed.

Inspired by "Women in Science: 50 Fearless Pioneers Who Changed the World" by Rachel Ignotofsky, and go well together as a gift or for yourself. The first couple of pages include formulas, measurements, equations, periodic table, and more. Very well organized and easy to understand. The rest of the book is a cute notebook great for science experiments and/or journal entries. Wish I had this when I was in school.

My science loving future astronaut niece absolutely loved this!

bought as a gift and the recipient (age 14) just loves this journal

I really appreciate having this as a guide for how to setup a journal writing project. Too many words required.

I ordered these thinking they would be black. Instead they provide guided journaling. I am sure that will also be fun, but it wasn't what I was looking for.

Excellent product. Exceeded my expectations.

The book is nice but it is smaller than I had thought it would be. It will be great for my 9 year old nephew.

I loved this!! I bought the women in science book and enjoyed it a lot. I'm a researcher and I'm trying to get into a routine of writing my ideas in one place, but didn't have a special journal for it, so I bought this. Even though it's directed to kids I love it! It has a lot of motivational quotes and also some directing your writing. The only thing I would say is that the cover could be a bit harder (more like the women in research book) and it would be great if it could stay open easily, as it tends to close if you are not holding it. This is a beautiful journal that I would have enjoyed as a teenager but still do as a researcher!
