My 2 year old loves this book! Its meant for older Kids, but it's illustrated so nicely that my toddler girl easily learnt about digestive system, muscles and bones!

My 4 yr olds are VERY interested in how the body works and what's inside them (they don't quite get that you can't unzip you skin to look inside, but that will come :))..... the flaps are great fun and the pictures aren't over stimulating for younger children. It has elicited conversations about their bodies as well as spontaneous (and sometimes funny) questions about body functions. They're able to explain in basic terms what their body is doing when they have a cut, have to go potty, eat food,

etc. Pretty cool!

My 5-year old, advanced reader wanted a "lift the flap" book. I didn't think I'd find something that would be suitable for her, but this is perfect. I have a 4 year old non-reader as well. He loves the book too, although I imagine it will be better for him when he's 6 and older. It has spawned so many interesting discussions. As an adult, I think I've loved it as much as they.

My five-year-old son saw this book in his pediatrician's office and just had to have one of his own. He loves the colorful illustrations and flipping the boards up and back for the views. Great book!

Pretty decent.

This book is really cool! My kids love it and ask more questions so I have more opportunities to teach them about themselves.

Fantastic book! Perfect for my 3 1/2 year old. The pictures are big and there are a lot of flaps and simple explanations throughout.

Wonderful book full of lots of flaps and information! My 5 year old loves it!
