Customer Reviews

This workbook is very helpful in studying Biology (the Dragonfly text). I got one for each of my kids, so they can test their knowledge by answering questions, and filling in the blanks, diagrams and charts after studying each section, without having to create their own note-taking pages. Save time, and there are also exercises and questions they may not have thought of if they were doing note-taking by themselves.

Good for high school

Great book for homeschooling! Easy to understand, packed full of knowledge, and great graphics!

The workbook correlates well with the assignments that my son has received at school. The

drawback is there is no answer key. That would be a great help.

Using it everyday

Just what I wanted

We have not been able to use this for our homeschooling biology yet. We did not realize we needed to purchase the text book in order to even be able to answer the questions, but flipping through the book it looks like a very thorough program & we are excited to get started!

Quick shipper, book was in excellent condition! My son lost his book for class and I was able to find this book and get his replaced with only 1.5 weeks going without a book.
