The Southern Night Sky: A Glow-in-the-Dark Guide To Prominent Stars & Constellations South Of The Equator (A Pocket Naturalist Guide)

Synopsis

This innovative – Glow-in-the-Dark – pocket reference highlights prominent constellations and stars that are visible with the naked eye south of the equator. Simply shine a light on the guide to illuminate the constellations and their names on the summer or winter star charts. Also includes descriptions of the meaning of each constellation and instructions on how to use your fingers to 'walk' between constellations to find prominent stars. Laminated for durability, this clever guide is an excellent source of portable information and ideal for field use by novices and experts alike. Made in the USA.

Grade Level: 5 and up

Customer Reviews

The Southern Night Sky, An Introduction to Prominent Stars and Constellations, is a must-have reference guide for any stargazer. This indispensable guide highlights prominent constellations that are visible from cities throughout the Southern Hemisphere in summer and winter. Glow-in-the-dark star charts allow easy identification of shapes and names of prominent constellations. The Pocket Traveller Eco-Travel Guides provide simplified reference to the prominent wildlife species of the world's most popular eco-tourism destinations. Each pocket-sized, folding guide identifies up to 150 species of common and unique animals in each area and most feature a map highlighting natural

vegetation zones. Each is laminated for durability. (31/2 X 81/4 folded, opens to 22 X 81/4, color illustrations, charts)

Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

Keep in mind this is a pamphlet and not a book, so the information is limited. That being said, it is easier to carry around than a book. The glow in the dark stars is a nice touch at night. Overall, the product is great, waterproof coating makes it almost indestructible.

This is a very basic star chart, with some supplemental information about the constellations. It is well made and nicely coated. It is not designed for serious observing or star-hopping. Probably a great tool for teaching kids.

My daughter, grandchildren and I all enjoyed the two copies I bought. Useful in the field, kids love the glow in the dark aspect!! I live in NC and family are in CO works well in both places!

not much there

fun pamphlet to teach others.

Thank you

Extremely informative and easy to follow. Great way to learn the star system in the sky

Awesome little reference sheet! Fits my needs!
