Disciplined Entrepreneurship offers the first real-world, practical, and immediately employable road

map for those engaged in creating brand new, innovation-driven enterprises. I cannot recommend that book highly enough. The workbook presented here takes that practical framework, and supports it with explanations of how to proceed down that road map, step by step. It describes the purpose of each step, as well as why each step exists in the sequence where it does. And within each section there are *extremely* helpful forms to organize the information users will discover and generate through their efforts. Included:--Exceptionally good road map with sequential steps.--Explanations of the reasoning, as well as practical methods and approaches.--A robust set of practical, valuable forms. It's a *stellar* set of concepts and tools to support entrepreneurs engaged in building something entirely new. Founders, owners, or product manager/program managers engaged in building innovation-driven businesses will benefit directly. I suggest that this book should be an immediate purchase and a well worn tool in your toolbox. You will immediately simplify your cognitive load by doing the right things in the right sequence. You will immediately improve your performance by capturing and organizing ideas and facts *outside* of your brain, where they can be viewed, communicated and worked on. You will immediately improve your performance, by focusing not only on what matters most, but on the key elements of those factors. I firmly believe that this book will deliver tangible, real-world gains to every practicing entrepreneur. I am certain your business will benefit directly and immediately. It's that good.

When it comes to entrepreneurship, this book should be your go-to. Bill Aulet's ability to dive into the steps and intricacies of starting a company are absolutely top notch.

I have actively used the Disciplined Entrepreneurship Workbook as a participant in the MIT Global Entrepreneurship Bootcamp. My startup team and I received an early publication hard copy hot off the press. While we received the workbook right from the source (author and MIT Bootcamp leader Bill Aulet) the real value of the workbook is in its simple and clear sequential roadmap to entrepreneurship with easy to follow depth of detail for each and every step on the entrepreneurial journey. As a voracious reader and serial entrepreneur, if I was asked to recommend just a few books for aspiring (and existing) entrepreneurs, I would most definitely include Bill Aulet's books on entrepreneurship on that short list.

I'm a big fan of companion workbooks as they put you through actually exercising the materials with additional explanation on usage. Disciplined Entrepreneurship Workbook fills that role perfectly. Well worth the investment

This workbook is an essential tool for entrepreneurs. Awesome as expected.

Hard to follow if you don't have somewhat of a business degree.

Not what I expected, but will keep because I don't want the hassle of having to return

This workbook makes Bill's book *Disciplined Entrepreneurship* twice as valuable. The workbook offers practical, easy to use exercises that help clarify the 24 steps to a successful startup. This is a must have addition to the original book.
