Customer Reviews

I bought this map as a overall map of my Peleponese ring tour.It can be useful to get the general idea but not enough details to use it as a sole source.I used iphone map as a navigator and iPhone was not enough on itself either, but together with this map and asking locals where to go, we managed to get to all the destinations.

This map is adequate for trip planning. However, at a scale of 1/700,000, it lacks adequate detail to find your way on secondary roads. As with other Michelin products, I've found it accurate (look closely and the spatial relationships between map symbols are correct) but it is not very detailed: there are many more intersections, villages etc. than are (and could possibly be) featured. Combined with the inconsistent density of road signage in Greece, we've often had to "feel" our way to our destination, for instance in the mountains of Arcadia. I would suggest supplementing this map with a more detailed one of the specific Greek region you'll be driving through.

One of the few Greece map. It did the job.

This was for a trip to Greece

We rented a car in Athens and traversed Greece. We really appreciated having the map with us. It'd be best to supplement the map with some kind of GPS option on your phone. It's easy to get lost in the cities.

Michelin makes an awesome map!

just not that helpful

you need to know Greek if you get this map
