By the time teens are in high school, they have already spent years wrestling with a heavy backpack. It's time to solve this problem—and Pearson can help. Explore Pearson@home math products for home use. Book Details: Format: Hardcover Publication Date: 1/15/2008 Reading Level: Age 14 and Up

So disappointed with this text. Pretty standard math teaching - nothing inspired. Plus, not all the odds have answers in the back - just "selected" ones. Pretty useless for independent work. It is the text book of choice for an independent high school online class so we don't have a lot of choice.

Purchased for Home School use. Upon opening the textbook, the riot of colors, pictures and "helpful extras" in the margins nearly made me nauseous. Design out-competes content to the point of distraction. Explanations and examples are poor. Concepts previously taught were confounded and confused when the topic was covered in this book. We literally gave up on the text.

This book is in pristine shape!!! It is practically brand new!!! Totally pleased with this purchase.

Books were great.

Good book

As good as a textbook can be considering it's aligned with Common Core.

Explanations are good, and problems are ample in number and of an appropriate variety.

thanks
