Mosby's OB/Peds & Women's Health Memory NoteCards: Visual, Mnemonic, And Memory Aids For Nurses, 1e

Synopsis

Use this set of colorful cards to master concepts in maternity, women's health, and pediatrics! With 65 cartoons covering key topics, Mosby's OB/Peds & Women's Health Memory NoteCards: Visual, Mnemonic, and Memory Aids for Nurses uses humor and illustrations to make studying easier and more fun. These durable, portable cards use mnemonics and other time-tested memory aids to help you prepare for class, clinicals, and the NCLEX® exam. Created by nursing educators JoAnn Zerwekh and Cathy Miller, this one-of-a-kind tool makes studying obstetrics and pediatrics an exceptionally memorable experience! 65 full-color cartoons offer a humorous and engaging way to learn, including cards on nutrition and diabetes in pregnancy, preeclampsia versus eclampsia, sexually transmitted diseases, respiratory distress syndrome, RSV, and childhood diabetes. Mnemonics and other time-tested memory aids help you grasp and remember even the most complex concepts. Colored thumb tabs make it easy to find topics quickly. What You Need to Know monographs on each card provide more detailed information and specific nursing implications. Sturdy, spiral-bound cards offer durability as well as portability. Unique! Color highlights emphasize four central topics: Serious/Life-Threatening Implications in pink Common Clinical Findings in blue Important Nursing Implications in yellow Patient Teaching in green

Customer Reviews

I bought these thinking I would be using them like crazy, but I ended up not using them at all. I still think they are great reference cards regardless. The front has pictures to help you remember

whatever the subject matter is your looking at, and the back has information about the topic. I guess for me personally, I just didn't utilize them often enough.

Admittedly I'm bias, as I like all the notecard series from Mosby. I know some people complain that it does have all the information, or it isn't detailed enough. That's not the point of these. They are meant to be a simple and brief outline of the essential information. In that regard, they are fantastic. TO add to that great information outline, the cards themselves are build on very thick and sturdy cardboard. I don't worry about durability. The Fluid and Electrolytes cards I've had in my backpack since day one of school, and they don't show any wear. My only suggestion: If you're looking for a resource for more extensive information, I'd go with the "Made Incredibly Easy" series of books. They are a bit more detailed, but still do a good job of keeping it simple.

Really love these cards. They have helped me in OB, Pharm, and Fund. Great illustrations, and mnemonics, easy to read and follow and on the back of the pics they have nurse interventions and considerations listed! Only wish I had one for every subject!

Helps me read those monitor strips with confidence and guides me through the most thorough assessments. Invaluable resource for new nurses or those floating to maternity on occasion.

The illustrations are great for the learning aspect, very funny yet concise and concrete with the basis of the information needed for learning the OB/Maternity portion of RN school.

Would recommend any book in this series passed NCLEX

Really enjoy this resource and love the visual layout of book. Definitely great for visual learners.

I love the memory notebook series. Yes, they are a bit silly but that's exactly why you remember the material. These cards helped me pass my NCLEX predictor exam as well as the NCLEX itself. I recommend them!!
