Customer Reviews

The 1-star reviews are right. This appears to be the work of (possibly) a pre-teen for whom English is a second language. Educational level is low and statements regarding safety of all natural products are FALSE. There are many poisonous plants and Oleander is just one of them! I would hope American adults know this. I gave this 2 stars rather than one because I have not tried any of the scent formulations and some of them may be fine.

Basic Perfume Making: Good recipes with essential oils and bases. If you are looking to get started, this is a good place.

Reference this often to create my own perfumes! Excellent!

LOVE IT!!!!

Thank you very much.

as described

This ebook is great. I am in the process of starting a small lotion, soap and candle business. While not all the recipes are easy to follow, from experience with essential oils, I know that there are great combinations here. It is a good start and gives you an idea of what goes together to create a good and useable fragrance.

Very informative, exactly what I have been looking for. All natural is the trend and a great trend it is.
