# The Bay Islands Of Honduras

## Synopsis

The Bay Islands of Honduras, which extend up to 40 miles northeast of the north coast of Honduras, are remnants of the peaks of the Bonacca Ridge, a submerged mountain range that extends out from the mainland's Omoa Ridge. The three larger islands, Utila, Roatán, and Guanaja, are long-time premier diving destinations that offer spectacular coral reefs and powdery white sand beaches. These three, together with three smaller islands just east of Roatán, Morat, Barbareta, and St. Elena, as well as more than 60 cays, lie on a reef system that forms part of the second-largest barrier reef in the world. It creates natural breakwaters around the islands providing calm coastal waters that are ideal for diving, swimming, and snorkeling. Turquoise blue waters with 80 to 150 feet of visibility, an average temperature of 80° F, and an amazing reef system hosting much of the marine life diversity found in the Caribbean, offer some of the best scuba diving and other water sports you will find anywhere. This guidebook by Maria Fiallos is the best coverage of the Bay Islands available. All the dive sites, all the restaurants, and all the hotels from budget to luxury. The author is a real expert, and the information is fresh and complete. -- Melanie, reviewerA great new resource --Travel + LeisureBursting with relevant and exciting information... --

This book was originally published about 10 years ago so the information in it is practically useless.

Just good for a general overview of the islands. Would not recommend.
