Customer Reviews

The author recommends using Bergamot essential oil in a bug spray, but fails to warn her readers about this essential oil. You have to use bergamot that has had the bergaptene removed otherwise with prolonged exposure to sunlight your bug spray will become toxic and poison you. These authors that look up essential oils and herbs, then think they are experts in the subject are Stupid, Reckless and downright DANGEROUS. Nowhere did I see a warning that using any essential oils while pregnant could harm the child or cause a miscarriage. This author seems to be an other person who thinks that just because essential oils and herbs are natural they won't harm you and writes like it. The majority of poisons in use are plant derived. Think about that before you take what this fool writes as gospel. Lastly, Jennifer Tynan, show me a bottle of Catnip Essential Oil. I've worked with them for over 20 years, and while I'm not an Aromatherapist, I've never ever seen that. I even checked the websites of 2 companies that make and sell essential oils (Aura Cacia and Edens Garden) and they don't have it. Show me a picture of the bottle. This book should be pulled before someone gets hurt or worse.

I tried a few of these recipes last week. I'm not sure if one worked better but one of them, or all three saved my kids play area. I am going to try the bomb repellent for another area in my yard but I am more than pleased with the results. I bought the lotion book from this author too.

Comprehensive. Great read! Easy to understand affordable recipes to keep the bugs off without poisoning myself with chemicals. Will be trying some of the recipes asap.
