Customer Reviews

A fan who uses the book wrote to the paper claiming it's "The best item any traveler could acquire."

-- San Diego Union-Tribune.

Jonathan Meader is an artist/author now living in Northern California. His artwork has been exhibited from Paris to Moscow to Tokyo, and is in major museum collections. He has spent years living and traveling abroad. Sculptures of women are a focus of his antiquities collection.

This little book comes in handy during my aphasia group meetings. I am a speech-language pathologist (SLP). I run aphasia communication groups. Aphasia is an acquired communication disorder resulting from a "brain" thing. Most often, people acquire aphasia as a result of a stroke, but can also get it from a head injury, brain infection, tumor, progressive brain disorder, etc. Aphasia can impact communication output systems, such as talking, writing and making meaningful gestures (like gesturing for people to "come here") and/or communication input systems like understanding what you read, what people say to you or what gestures mean (like the gesture one might make if you cut them off in traffic). In my groups, people with aphasia use the books to point to items when

they cannot say the word. The additional benefit is the small size. They fit into a pocket neatly.

Terrific problem solver, recommend for traveling to any country where the language differs from your own. Also very helpful for hospital, convalescent, or hospice situations where patient is unable to speak or speak clearly. Also for children as a learning tool. I used it to locate eyeglass repair, communicating that I do not eat red meat, and to determine how hot the spice was on menu items!! Fits in a pocket and now even more conveniently on my smart phone - making it easy to find and use!! Cool tool.

very clear and compact with good images. We had something similar in the past which we used frequently on international travel. We gave it to an international host and bought this as a replacement. Great to communicate when you don't share a language.

Neat little pamphlet with pictures of the many common items a person traveling might need. Just point to the picture of bathroom and the other person can show you what you need.

I'm going to Vietnam in January. I'll find out how well it works when I get there. It looks great though.

I got the book to help my wife who has Aphasia- loss of the ability to speak. It is not ideal for that purpose but it is very useful.

Good read but need to digest it slowly.

Making communication and my stress level so much better. No hard pronunciation needed and I just loaded it on my Kindle. Love it. Thank you.
