Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

This book along with my GPS and other books on the ghost towns and history is exactly what I needed to get the most out of the areas where I live and to learn what took place there in the early 1900's. I drive a Jeep Wrangler and want to see and learn everything I can about the areas in Southern Nevada, so with this I can map out my route and plug the info into the GPS and away we

go. Every road is precise and up to date and very informative. Even if I was to get lost it would be an adventure, and I wouldn't stay lost for long. I highly recommend this series of atlas for anyone who wants to get out and do some exploring of their own.

This atlas of roads and geographic features in the Silver State is easy to use, complete, and satisfies my interests as a weekend back roads enthusiast. From what I have experienced so far, and from personal knowledge of some obscure parts of the state, it is reliable and thorough. Compared to the other popular atlases in this format and size, it rates EXCELLENT. Easy to read, easy to use when orienting in the back country.

A very useful highly detailed map atlas for Nevada at a reasonable price. If you live or travel in Nevada it can be most helpful, especially in rural areas.

I have several other states in the Benchmark series, and Nevada -- like those -- is superior to the Delorme Gazetteer. The characterization of roads is more accurate -- roads that are unpaved are shown as unpaved, and they accurately differentiate between 4x4 roads and better unpaved roads.

Wonderful large maps detailing all roads, streams, and campgrounds. So handy.

This is perfect for 4x4 exploration. I've used this extensively the last few months. If one has a GPS unit you're set to see all the ins and outs of Nevada.

Five Stars - JD
