# Macroeconomics In Context, 2nd Edition

## Synopsis

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

## Book Information

Paperback: 496 pages

Publisher: Routledge; 2 edition (December 19, 2013)

Language: English

ISBN-10: 0765638746

ISBN-13: 978-0765638748

Product Dimensions: 9.9 x 8 x 0.6 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

## Customer Reviews

'This book is a truly Europeanised version of the well-established introductory textbook by Goodwin et al. which enriches the common narrative of economics by adding further perspectives and analytical approaches without being confusing or too complex. The European version contains a wealth of new content on debt and deficits, economic policies, institutions and actors in the European Union. The book will surely support students in gaining a profound, practical and multi-angled knowledge of economic issues which they can apply to understand and analyse real-world phenomena, like the emergence and evolution of the recent financial and euro crises which has so dramatically influenced European economies.'

—â„¢ Å Prof. Dr. Torsten Niechoj, Rhine-Waal University of Applied Sciences, Kamp-Lintfort, Germany

—ËœAn excellent source for lecturers who are struggling with teaching economics inside the straightjacket offered by the usual mainstream textbooks; it makes both studying and teaching more enjoyable,

vision-broadening and real-life embedded by discussing issues within the historical, social and environmental contexts.

Assoc. Prof. Derya Gultekin-Karakas, Istanbul Technical University, Turkey. "The new edition of Macroeconomics in Context is the best English language introductory macro textbook with a focus on Europe. Three unique features make it outstanding: first, the "contextual" approach viewing economy as embedded in society, nature, institutions and policies; second, a thorough focus on the European Union; third, a response to the quest for more pluralism in theories, with both Keynesianism and mainstream macro plus related controversies."

Jan Priewe, Professor (em.), HTW Berlin University of Applied Sciences, Germany "For decades there has been a lack of a relevant and pluralist introductory textbook to macroeconomics with a focus on the European economy. The European edition of Macroeconomics in Context fills this gap, and I hope it will be widely used in classrooms."

Eckhard Hein, Professor of Economics and Co-Director of the Institute for International Political Economy (IPE), Berlin School of Economics and Law, Germany. "The long financial and economic crisis was a test for governance but also science. Gaps between economic doctrines and the real world were exposed. This book offers a fresh and accessible introduction to the principles and methods of macroeconomics and builds on them a lucid overview of current policy issues from euro area imbalances to sustainable growth."

László Andor, Head of Department of Economic Policy, Corvinus University, Budapest; former EU Commissioner for Employment, Social Affairs and Inclusion.

Neva Goodwin is Co-Director of the Global Development And Environment Institute at Tufts University, USA and Co-Chair of the Board of the New Economics Institute. Jonathan Harris is Senior Research Associate and Director, Theory and Education Program, Global Development and Environment Institute, Tufts University, USA. Julie Nelson is Department Chair and Professor of Economics, University of Massachusetts Boston, USA. Brian Roach is Research Associate, Theory and Education Program, Global Development and Environment Institute, Tufts University, USA. Mariano Torras is Professor in the Department of Accounting, Finance and Economics, Adelphi University, USA.

When I got book it looked like it was sitting in the rain for hours, don't mind because it was cheap to rent rather than buy.

Navigating through this book was not at all intuitive or easy. It lacked features that other textbooks

have.

I use the book at least once a week and was very useful for class. Found some interesting things here and there.

Good
