Hat Tricks Count: A Hockey Number Book (Sports)

Synopsis

The companion volume to our bestselling, Blue Spruce Award winner, *Z is for Zamboni: A Hockey Alphabet*. Like our alphabet series our counting books are written in a two-tier format with charming poems for young readers and expository text for older readers. Young sports fans see numbers everywhere--the scoreboard, the retired jerseys in the rafters, the numerology of sports stats--and *Hat Tricks Count: A Hockey Number Book* delivers them faster than an assist from the Great One, number 99 himself. *Hat Tricks Count* will answer many of the fast paced questions kids have. What is a Hat Trick, anyway? Cross checking, high sticking, and hooking penalties add up to what? Who scored more career goals--Gordie Howe or Wayne Gretzky?

Customer Reviews

This sturdy board book is colorful and fun especially for a 2 year-old boy in my family daycare who is obsessed with hockey right now. We keep it in a special place in our cozy book corner for him. Another 4-year old who is a hockey team drop-out at the moment is rebuilding his interest in playing and this book is a great help and encouragement. I gave them their own copy for Christmas and it has a place in the 2 year-old's crib at home.

This was a gift for my hockey-crazed four-year old nephew, along with the alphabet hockey book. He is always on the go and it is difficult to get him to focus on anything for a long period of time. However, after giving him these books, he immediately sat down and looked through the whole book! I like that it has a short rhyming sentence for the younger child, but there is more information on the side of each page to engage him in when he gets older.

Great books and the board book version is great for younger kids. Highly recommended

As big hockey fans, this was such a great book for our son to learn numbers. It is sturdy and the illustrations are very sweet. Highly recommend it.

Okay for younger kids who are learning to count, most appropriate for 5 year olds. Not much hockey information for older kids.

Yup, it works for hockey and numbers. Betting it is written by a Canadian though (not a problem, just an interesting side comment). You'll have to buy it to find out why.

One of the best books for all kids especially hockey players and fans. As a parent I enjoy reading it as much as my kids joy hearing it.

My hockey crazy 3 year old grandson loves this book and we can practice our counting too
