The Bug Out Gardening Guide: Growing Survival Food When It Absolutely Matters

THE BUG OUT
GARDENING GUIDE
RON FOSTER

Synopsis

What exactly is Bug Out Gardening? Having your own survival garden in your own back yard is great but what if you must evacuate and have to go to a remote location or start up a garden on a bunch of bad soil? Most preppers have already realized that besides having dried foods stored for a disaster, one can also have fresh grown foods with a little effort supplementing their diets. This book will teach you how simple it can be to take along the materials with you to create a small survival garden. Learn to make your own DIY miracle grow and homemade insecticides and fertilizers! Learn about growing vegetables from scratch when it absolutely matters before you find the stores are all closed and that you lack basic materials. Envision a portable system of gardening that you can instantly create your homestead with or take along for a long-term bug out situation. Imagine that this system allows you to garden anywhere, compost anywhere, and thrive everywhere. Everyone should have access to healthy organic food, and this is gardening made easy. Whether your plan is to bug out or bug in, whether or not you want to start a garden on your balcony or move to the country someday, this is the system for you. Learn gardening tips and tricks along with survival techniques. Plant your very own portable medicinal garden and gain experience with remedies. Learn to grow food in a disaster and feed your family. This and so much more is included in this book. Gain the knowledge of how to create a bug-out garden that can be assembled anywhere or explore other systems to double your current gardens output and sustainability in a small space. This book includes a preppers herbal guide to medicinal plants and their uses.

Customer Reviews

another great book by this author this time a non fiction about growing food, in the 21st century..simple and easy to read!!yet it is full of much info to make a master in the garden ,glad they read it

This book is not a beginner's guide. If all you have successfully grown is a chia pet, all of your garden tools are from the dollar store, and the only seed bank you have is what you have been scraping out of grocery store produce, you have a long way to go. Now, if you have met Mother Nature on her own terms and are well on your way toward self sufficiency, then The Bug Out Gardening Guide is a must have for your survival library. Written from real world experience, Mr. Foster's easy conversational style presents a wealth of information on the who, what, where, why, and how of survival gardening in a very readable and entertaining fashion. It is loaded with tips, techniques, ideas, and practical hacks. Fertilizer belongs in gardens, not books. Mr. Foster provides several good recipes but no bovine excrement. Highly recommended for those who are serious about making it through tough times ahead.

This is an amazing resource that covers how to make your own fertilizers and your own natural pest control as well as gardening shortcuts for bad soil conditions and so much more. You will learn a lot with this book.

So much information packed in here for anyone who gardens and wants results!
