# Newsday's Guide To Long Island's Natural World (Falcon Guide)

## Synopsis

For more than two years, a team of Newsday reporters and photographers explored the woods and waters of a world most visitors to Long Island never see. As they waded through bogs, kayaked on the island's four rivers, hiked through pathless forests, and ventured into the Atlantic in shark cages, they made surprising discoveries: insect-eating plants, tropical fish, exotic lizards, birds of prey nesting along golf courses, and much more. Newsday's Guide to Long Island's Natural World is the result--a colorful and authoritative guide to the natural environment of Long Island. Taking full advantage of color photographs and detailed maps, this book guides readers in a fascinating exploration of Long Island's fields and forests, beaches, and backyards.

## Customer Reviews

For more than two years, a team of Newsday reporters and photographers explored the woods and waters of a world most residents and visitors to Long Island never see. As they waded through bogs, kayaked on rivers, hiked through pathless forests, scoured the Island's grasslands and skies, and ventured into the Atlantic in shark cages, they made surprising discoveries: insect-eating plants, tropical fish, exotic lizards, birds of prey nesting along golf courses, and much more. The result is Newsday's Guide to Long Island's Natural World - a rich and authoritative handbook about the

natural environment of Long Island. Through in-depth stories, color photographs, and detailed maps and listings, this book takes readers on a journey through Long Island's bays, beaches, woodlands, fields, and backyards.

Newsday is a frequent recipient of many of the nation's most prestigious awards for excellence in journalism, including seventeen Pulitzer Prizes.

Hooray! There are still plenty of beautiful places on Long Island that celebrate the natural world and the joys of being part of it. This book is a terrific guide to identifying and locating those places. Five stars for the gorgeous photos alone, which are accompanied by accurate and concise captions. Within each chapter, the inclusion of contact information for each site is sure to put an extra bit of motivation into poolside "lounge potatoes" to get up and get out there. A separate section called "Museums and Educational Centers" appears at the end of the book, as well. The paperback format makes it easy to throw into a backpack.

If you live on Long Island and love nature this is the book for you. Our family was amazed to read about all the wonderful places and things to do right here in our own back yard. We will enjoy this book for many years to come.
