5-Star Reviews: Jacqui Letran's self-help guide for young adults is an engrossing and highly accessible guide for anyone who'd like to understand why they react to stress and stressors the way they do. I was impressed by the way the author introduces the complex and complicated processes that go on in the human mind and especially appreciated how she's adapted her findings and techniques to work with young women. Her case studies were fascinating and clearly demonstrated how depression and other mental health issues can sometimes be resolved without the use of medicines and traditional therapeutic methods. This is a well-written and informative work that is neither condescending nor patronizing of its target audience, and it is highly recommended. Reviewed By Jack Magnus for Readers' Favorite

Easy Reading and to understand. I tried a few of the suggestions presented and was surprised that they worked. For myself as well as for my students. Simple easy to read and to understand. Useful for parents, therapist and spouses. I tried the suggestions presented and achieved the desired results.

This is an excellent book for teens and their parents. It shows how each of us interprets things differently and that we need to be more understanding of each other. I really like the case studies. It helped me to understand where some of my beliefs came from and what I can do about them.

Very informative and simple

I wish this book was around when I was a teen, it is an easy read and even though targeted at teenagers it expanded my mind as an adult in her late 20's. Jacqui explains the science behind her writing and then transforms it into a metaphor to enable the reader to easily absorb the information. I have experimented with the techniques mentioned in this book and seen great results!

This book is fantastic! It teaches you how to control your thoughts and feelings and be in control of yourself. I was so out of control when it comes to my feelings before. Now I know what to do. Thank you!.

This book is for anyone. You'll learn a lot about how your mind works and how to be in control! I love knowing that I am the boss of my mind and that I can control my thoughts and feelings.

I love this book. I read the whole thing in a couple of hours and I highlighted so much from it. I would definitely review them again. There were so many things I didn't know about my mind and myself. Everyone should read this book, not just teens!

I wish I had this when I was a teenager.... I'm so thankful I have it now to prepare me for my soon-to-be teenage daughter =)
