Problem Solving Cases In Microsoft Access And Excel

Synopsis

Show your students how to maximize the advantages of the latest Access database management system and Excel spreadsheet to effectively analyze and solve real-world business problems with **PROBLEM-SOLVING CASES IN MICROSOFT ACCESS AND EXCEL, 14TH ANNUAL EDITION**. Packed with hands-on applications, this edition highlights six user-friendly tutorials that build students' practical knowledge as they walk step-by-step through each software application's capabilities. Twelve all-new case studies present scenarios and problems common in real-life practice while a wealth of online instructor resources support your teaching. In addition, a unique emphasis on skill-building integration requires students to use Access and Excel together on cases, demonstrating the power when these applications work together. Count on **PROBLEM-SOLVING CASES IN MICROSOFT ACCESS AND EXCEL** to deliver today's most up-to-date, practical guide for the widely used Access and Excel programs.

[View larger](#) [View larger](#) [View larger](#) [Tutorials Simplify Learning](#) The Excel Scenario Manager tutorial and Excel Solver tutorial in the text are streamlined and simplified to make it easy for you to master the latest features available within Excel. [Realistic Business Scenarios Provide Practice](#) Each of the cases introduces a commonly occurring business issue, enabling you to learn how to use Excel and Access most effectively to analyze and solve problems

through hands-on practice. Skill-Building Instruction Demonstrates The Ins & Outs Hands-on tutorials prepare you for the real workplace by sharpening your spreadsheet and database skills. Working With Access & Excel Together Two cases in the text require you to apply both Access and Excel simultaneously, helping you develop analytical skills as you put your newly acquired knowledge into practice.

Ellen F. Monk has been teaching Information Systems at the Lerner College of Business and Economics at the University of Delaware since 1989. Prior to her teaching career, Dr. Monk worked as a chemical engineer for Engelhard Industries and W. R. Grace and Co.'s Davison Chemical Division. She has a B.S. degree in chemical engineering, an MBA, and a Ph.D. in MIS. Joseph A. Brady taught MIS courses at the University of Delaware from 1990 to 2009. Prior to launching his teaching career, Dr. Brady worked as a financial analyst for E. I. Du Pont de Nemours. Dr. Brady has an M.S. degree in computer science, an MBA, and a Ph.D. in education. Emilio Mendelsohn joined the Lerner College of Business and Economics at the University of Delaware in 2012 as an adjunct professor of Management Information Systems. He currently works as a risk manager for U.S. Bank in the Retail Payments Solutions Division. Formerly, Mr. Mendelsohn worked for JPMorgan Chase and Co. as an application manager in the Engineering and Technology Department and information risk analyst in the Information Technology Risk Management Department. Mr. Mendelsohn has B.S. and M.S. degrees in management information systems.

Had to have it for a class. Was a helpful book.

Absolute garbage book. Was forced to use this book by a professor that obviously doesn't care about her students. Teaches nothing, errors aplenty, confusing instructions. Another book made to steal from students

Perfect condition!

I can't believe they make us buy this kind of overpriced lame textbooks. I'm glad I'm graduating in May cause I'm done wasting money on stupid, lazy written books.

Well, I need more time to read it to the end.

The textbook starts off with great information then sometimes lacks the connection from one step to the next in completing the problem or in this situation the case problem.

I'm so glad I can go further into crippling debt by buying this book. I can't pass the class without it and it teaches me absolutely nothing! Thanks college!
