Alien And The Wedding Planner

Synopsis

It was just one of those days...After catering a particularly difficult bridezilla, successful wedding planner Alana Watson can't wait for the wedding season to be over. Or at least, she hopes to get a reasonable client. That is why she's excited when a pair of insanely gorgeous men come to her shop for a consultation. But no, they aren't a couple and they ask weird questions. Things escalate when one of them decides to kidnap her and bring her to his home planet . . . This alien feeling in the alien's heart Lord Ice Silverkiller is a renowned scientist on his home planet, Crimea. His planet is dying and it seems his people don't want to procreate. His emperor orders him to find a solution. Ice and his crew then embark on the first expedition to Earth. They want to know the secret behind the humans' explosive population growth. But when he sees Alana, science is the farthest thing in his mind. And the chemical reaction between them is sizzling. Like other Crimeans, Ice is even-tempered and relies on logic rather than his heart. But there's nothing logical about this crazy urge to possess this curvaceous human female named Alana. Suddenly, he is hit by all kind of feelings he's never experienced before. To make love to her. Always worry about her. To protect her and keep her safe. To make her his. Ice wonders if he finally feels what the humans called love? Because this newfound love and Alana might be the keys to save their dying race...

Customer Reviews

I was pleasantly surprised at how much I enjoyed this book. I actually own quite a few of her books but they always seem to get further down on my to be read list although after reading this book, they are going to be moved up a lot quicker. The premise basically is that an Alien planet is dying out because there are no children being born so they are having to make clones in order to keep any population. Our hero Ice is sent to earth to find out why earth people have lots of children to a point where earth can hardly support the population. However due to the amount of time that information travels through space, the aliens are not dressed appropriately for the time period they have landed in. It is quite amusing how they go about trying to get information, even the public library kicks them out when they begin asking questions. They see a sign for a wedding planner and figure that she would know the information they seek as she plans weddings. She thinks they are a gay couple wanting to plan a wedding but before they can begin asking questions, they get an urgent message from their ship that there is an emergency. As they have not got the information they were seeking, Ice decides to take Alana with them. She is as to be expected angry but as she is there she decided to see if she can figure out the problem and help. What she discovers is that there are no families, clones are born full grown and their whole purpose in life is to do a good job. They have no interest in love or raising a child. Ice realizes that he is feeling things with Alana that he does not understand and that confuse him. When Alana finds out that he is a virgin, things get very interesting. She explains to Ice and the Emperor that in order for their people need to survive that they need to rediscover what love is and nature will take its course. This will also help earth as a certain amount of the population will go to Ice's planet hoping that his people will discover love like he did. Attempts are made on Alana's life and there are other surprises along the way that I will let you discover along the way, because if I were to tell you all the things that happened, then why would you want to buy the book and miss all the little things that added together make for a very big surprise that even I didn't see coming. I was gifted with an arc for this story and chose to voluntarily leave an honest review. The main reason that I wanted to leave a review was because as I said I have a number of her books that I had never read and reading this book made me realize that I was missing out and I intend to read some of those books that have been sitting on my to be read list. I recommend this book because I cannot imagine a society that does not know how to love and to see one earth woman help them to learn made this book very interesting and one I couldn't put down till I finished it!!

I received this book with the understanding that I could leave a voluntary and honest review. In this book we meet Alana Watson and Ice Silverkiller. Ice has come from the planet Crimea with others from his planet to learn how earth has been able to populate it's planet so abundantly. Crimea is a planet that if they can not figure a way to repopulate the planet will die out. So as a scientist Ice has volunteered to lead this mission and hopefully bring a way back to save his planet. Little did he know when he finally finds someone on earth to talk to he has to kidnap them to get the answers he needs. What happens though when Ice starts to wonder if he is actually the one that will get in the way? Can he and Alana find a way to save his planet or will they be it's demise? Alana is working a typical day in the bridal store. As a wedding planner she both loves and hates her job. So when two men come in looking like they have come from money she thinks she has found just the couple to brighten her day. Little did she know not only are they not a gay couple they aren't even human. So when they tell her they have to get back to their space ship, she thinks they are playing with her. What will she do when she finds out she has been kidnapped and is being taken to an alien planet for real? Will this be the end of her life or the start of something new? This is a great story that shows us you should never take things at face value. Digging deeper can lead you to the greatest results. There are some twists and turns in this book that I really want to tell you all about. As a reader myself I hate spoilers so I will never do that to another reader. I will say this book will have you hooked from the first word to the very end. I would highly recommend it to anyone and everyone.

Ice is the head scientist on the planet Crimea. On his planet, the Crimeans have lost interest in sex and procreation. Their race will soon die off if something isn't done. The king has decided to send Ice to Earth to study human's interest in procreation. However the mission doesn't go as Ice has planned. All their information about Earth is dated so they have no disguise. Ice and the military commander land on Earth to scout out information. Several of their attempts are humorous failures. Finally they visit Alana who is a wedding planner. Thinking that the two aliens are a foreign gay couple she is willing to help them plan a wedding. Then Ice gets a message that their ship has been sabotaged and they have to leave right away. He decides to bring Alana with him as their planets last hope. Alana is confused and angry about being kidnapped. She doesn't believe that she will be able to save the Crimeans and she just wants to go home. Problems on the return to Crimea has her fearing for her life and Ice's life. Luckily both arrive on Crimea safely. Alana talks with many Crimeans and discovers that they have mostly buried all emotions and desires. She has no clue how to fix them but she doesn't know that Ice is rediscovering his feelings for her. Maybe there is

hope after all. This is a great world building story. I voluntarily received a copy of this story and this is my honest review.

This was an okay read for me. It was an interesting story, I just didn't connect very well with Ice for much of the time as they aren't in touch with their emotions. For me it was more that he didn't seem to feel them about half the time, not that he just didn't know what they were. I did enjoy the story and Alana though. She had a tough situation that she makes the most of. There was a twist at the end that I wasn't expecting as well. The sex is fairly explicit and doesn't play a large role in the story. I did find the questions that the aliens asked quite funny in the beginning of the book. I laughed multiple times throughout the book and enjoyed reading it. I voluntarily reviewed an ARC of this book.
